Washington, DC - Congressman Charlie Gonzalez (TX-20) issued the following statement on Toyota's announced plans to temporarily suspend Tundra production in San Antonio:

"While this announcement is not welcome news, any business must anticipate and adapt to changing economic conditions. I view Toyota's decision as responding in a manner which will allow them to continue optimum operations at its San Antonio facility."

"Rising fuel costs and the ripple effect on various sectors of our economy present unique challenges which we will overcome provided we are resilient and creative in our responses. The duty of government officials at every level is to promote policies which accommodate the business community's realistic long-term plans, and I look forward to working with my local and state officials to accomplish this end."
