

Washington, DC - Congressman Charles Gonzalez (TX-20) issued the following statement applauding the decision by the United States Air Force to select Lackland Air Force Base as the site for its new cyber security command unit:

“San Antonio is ready to welcome the headquarters of a new cyber command to “Military City USA”. Recognizing our community’s vast military attributes this selection is great news and will bring new jobs to the area while enhancing our current missions.”

“Collective efforts to convince Air Force officials to locate the command at Lackland paid off. As an existing home to cyber offensive and defensive operations, I am confident we will meet the needs of the new command and provide the necessary infrastructure for a successful transition into our community. San Antonio’s technology work force will soon grow in size with the creation of new work opportunities and give our economy a boost.”
