Washington, D.C. – Today, San Antonio Congressman Charlie Gonzalez issued the following statement regarding the House passage of the debt limit resolution of disapproval:

“The bipartisan agreement to partner the increase of the debt ceiling with over $1 trillion dollar in spending cuts was decided last August. Tonight’s vote was another attempt to threaten the economic vitality of our country by refusing to pay our bills for nothing more than political theater. These antics led to America’s first ever credit rating downgrade, and our government cannot afford to operate this way. America was burned in August by Republican obstructionism, and today, they are still playing with fire.”
